TUAN T. LAM
PRIMARY EXAMINER

Art Unit: 2816

1. The following is an examiner's statement of reasons for allowance: the amendment filed 12/28/2004 has overcome the prior art of record. Samourai et al. (USP6,734,636), prior art of record fail to teach or fairly suggest a plurality of power source lines extending along direction in which the first plurality of first signal lines extend (power source lines VLd in figure 2 of the present invention in parallel with the scanning lines Yn), a conduction state of the first transistor (Qd of figure 3 of the present invention) being set by a data current that flows between one power source line of the plurality of power source lines and one second signal line of the plurality of second signal lines as called for in claim 21, a plurality of group of unit circuits that are disposed along one first signal line of the plurality first signal lines and one power source line of the plurality of power source lines (pixel circuits 20 disposed along scanning signal SY and power source line VLd shown in figure 2), supplying data currents that flow through the second transistors and the first transistors between the one power source line and a plurality of second signal lines during at least a part of the first period as called for in claim 35. Therefore, claims 21-41 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T. Lam whose telephone number is 571-272-1744. The examiner can normally be reached on Monday to Friday (7:30 am to 6:00pm).
